

Energy Projects

ArcelorMittal

Structural Steel For Energy Projects

Our Mission

To be the preferred supply partner of complete & customized steel solutions for the highly demanding energy sector by providing quality products in the shortest lead time. Our solutions are always near you as we have stocks in Dubai, Singapore, the Netherlands and Nigeria.

Our Stock Program

High Yield Seamless Pipes 4

- API 5L X52/L360 PSL 2
- S355NLHHO (S355G14+N)
- Norsok M-120 Y22

High Yield SAW Pipes 6

- API 5L X52/L360 PSL 2
- API 5L X56/L390 PSL 2
- API 5L X65/L450 PSL 2

High Yield Offshore Plates 7

- API 2W Gr 50
- S355MLO (S355G9+M)
- EN10225-1: 2019 S420MLO (S420G1+M)
- EN10225-1: 2019 S460MLO (S460G1+M)
- Norsok M-120 Y20/Y30/Y40

Boiler Quality Plates 8

- ASTM/ ASME A/SA 516 Gr60/65/70 NACE MR0175

HIC Tested Pressure Vessel Plates 9

- ASTM/ASME A/SA 516 Gr60/65/70 INDUSTRIAL CARELSO HIC PREMIUM+

European Sections 10

- S355J2+M / EN 10025

High Yield Offshore Sections 11

- EN10225-2: 2019 S355MLO (S355G11+M)
- EN 10025 S355ML
- Norsok M-120 Y26

Useful Formulas / Conversions 13

Comparison API 5L: PSL 1 versus PSL 2 13

Material Grade Comparison Chart 14

Comparison API 5L: PSL 1 versus PSL 2

The API 5L specification establishes requirements for two product specification levels (PSL 1 and PSL 2)¹. The two PSL designations define different levels of standard technical requirements. The table presented here summarizes the differences between the two levels:

Parameters	PSL 1	PSL 2
Steel grades	A25 - X70	B - X120
Dimensions	10,3 - 2032,0 mm	114,3 - 2032,0 mm
Pipe ends	Plain, threaded, bevelled, prepared for special couplings	Plain (unless otherwise agreed)
Welding process	All	All, except laser
Heat treatments (M,N or Q&T)	Not established	For all grades from B through X120
Chemistry defined	C/Mn/P/S	C/Si/Mn/P/S/V/Nb/Ti/CE ²
Max % C in seamless	0,28% for grades ≥ B	0,24% for N pipes, 0,18 for Q pipes, up to X65
Max % C in welded pipes	0,26% for grade B to X70	0,22% for grade BM to X56M, 0,12% for X60M to X80M
Max % P	0,030% for grade A to X70	0,025% for grade B to X80M/Q
Max % S	0,030% for grade A to X70	0,015% for grade B to X80M/Q
Carbon equivalent	Not required (only on purchaser's demand)	The maximum established for each grade
Maximum yield strength	Not established (minimum specified)	The maximum established for each grade
Maximum tensile stress	Not established (minimum specified)	The maximum established for each grade
Charpy impact test	Not required (only on purchaser's demand)	Required for all grades at a min. of 0°C/32°F
Repair of body by welding	Allowed	Not allowed
Repair of weld by welding	Subject to agreement	Not allowed
Certification	When specified per 10.1.2	Mandatory as per 10.1.3

The above table is extracted from API Specification 5L, 45th Edition.

¹ Our stocks are all specified in (the higher) PSL 2 grade, killed and made according to fine grain practice.

² Carbon mass fraction (of product analysis) equal or less than 0,12%, the carbon equivalent shall be reported as CE_{pcm}.

Note:

Annexes with specific manufacturing or service requirements

- Annex B: Qualified manufacturing procedure for PSL 2 pipe

- Annex H: Sour services PSL 2 pipe

- Annex J: Offshore services PSL 2 pipe
